## 1. Qualitative Information Concerning Quarterly Financial Results

### (1) Explanation of Operating Results

With regards to the economic circumstances of Japan during the consolidated cumulative period of 1Q, a moderate recovery trend continued with the normalization of social economic activities and recovery of inbound demand as the COVID-19 pandemic subsided, which is marked by the reclassification of the disease to Category 5 under the Infectious Disease Law of the COVID-19 pandemic. Looking ahead, the economy is expected to experience a moderate growth led by private-sector demand, coupled with the realization of the effects of the government's economic measures. On the other hand, however, attention needs to be paid to global inflation trends, sudden changes in currency exchange and financial markets, systemic financial risks, as well as other domestic and international circumstances such as downside risks in the economies of China, the United States, and Europe.

As stated in the government's 2022 strategy to "Make Japan the World's Safest Country," society's demand for security services are rising amid various developments, placing greater expectation on our Group to provide total services including security and facility management services and personal nursing cares. These developments are driven by the declining birthrate, aging of the population, the shrinking workforce, cyber-attacks on critical public infrastructures and supply chains, concerns about the safety and security of the elderly, women, children and other socially vulnerable groups, increases in violent street crimes and traffic accidents, natural disasters, and the aging of public infrastructures. In addition, with the current public anxiety about the domestic state of security following a series of events including the attack on the Prime Minister and widespread robberies and assaults, which caused the number of legally recognized criminal offenses in 2022 surpassing the same of the previous year for the first time since 2002, the society's expectations on our Group to protect public safety and security are growing ever higher.

Under these circumstances, the ALSOK Group has continued to provide appropriate services as an operator of service businesses related to the safety and security of society (the Security Services business, General Property Management and Fire Protection Services business, and the Lifestyle Support Services business including Long-term Care Services), which are indispensable for ensuring the stability of the lives of the people and the national economy. As stated in "Grand Design 2025," our medium-term management plan, we aim to be a safety and security service provider who persistently aims to serve the society's various needs for greater safety and security. To meet the expanding safety and security needs of our customers and society amid diversifying risks, we are working to provide new services that combine a variety of service functions, including security and facility management services and personal nursing care.

We are pleased to report that the consolidated net sales during the consolidated cumulative period showed a significant improvement over the previous quarter, with steady results even when compared to Q1 of fiscal year ended 2019 and Q1 of fiscal year ended 2020 before the COVID-19 pandemic. Specifically, consolidated net sales increased 6.7% year on year to ¥121,593 million, operating income increased 21.1% to ¥8,699 million, ordinary income increased 16.7% to ¥9,193 million, and the quarterly profit attributable to owners of parent increased 16.6% to ¥5,195 million.

By business segment, the figures achieved are as follows. Note that, effective from the consolidated accounting period of 1Q, the Company has changed its reportable segments and the method of allocation of certain revenues and expenses. For the purpose of comparison with the consolidated cumulative period of the Preceding Fiscal Year, the results of the Preceding Fiscal Year have been restated in accordance with the new classification and allocation method.

Sales in the Security Services segment increased 3.5% year on year to ¥92,370 million, while operating income increased 15.8% year on year to ¥9,210 million.

We have provided services for corporate clients through our Electronic Security Services business, promoting sales of ALSOK-G7, which includes live video monitoring as a standard feature, and optional services such as image storage and remote monitoring using images, as well as remote equipment control, which helps meet customers' manpower-saving needs. In the future, we will further expand the utilization of ALSOK-G7 to meet the needs of our customers. In April 2023, the Company also launched HOME ALSOK Connect, a new home security product as a service for personal users. In addition to the conventional Online Security Service, in which ALSOK rushes to the scene of an emergency, this product offers a less expensive self-security plan with optional on-site confirmation by ALSOK after notification of an emergency. The Self-Security plan can be upgraded to online security at any time. We have also continued and will continue to actively promote sales of HOME ALSOK MIMAMORI SUPPORT, a monitoring service for elderly individuals.

In the areas of stationed security services, we have provided security services for various G7 minister meetings, such as the G7 Hiroshima Summit, as well as security at airport facilities that reopened thanks to recovery of inbound demand. Going forward, we will work to reduce manpower and improve the efficiency of Stationed Security by utilizing DX and other automation technologies, and respond to the recovery of production sites in Japan and the post-COVID-19 full-scale resumption of domestic activity.

In the field of Transportation Security (= transportation of valuables) services, although the number of ATMs is decreasing due to the consolidation and closing of branches of financial institutions, the need to streamline cash management operations in the

public and private sectors remains as strong as ever. We will continue to aim at expanding our sales of online deposit (withdrawal) machine systems and other related products. We also offer a series of Tax Payment Receipt Systems, which automate counter services provided at satellite offices of municipal governments by utilizing our online deposit/withdrawal machine system. In addition, as a new solution to support regional financial institutions and others to improve operational efficiency and to reduce costs, we offer a centralized "electronic clearinghouse" service package to process bills and checks. We will continue to gain an understanding of various outsourcing needs and expand our service offerings.

In the General Property Management and Fire Protection Services businesses, net sales increased 19.1% year on year to ¥15,429 million due to steady growth in construction completions, etc., and operating income increased 32.2% year on year to ¥1,200 million. We will continue to expand Facilities Management Services based on the concept of integration of security, facilities, and construction, as we also strengthen our sustainability initiatives, including sales, installation, and maintenance of EV charging equipment.

In the nursing care service business, net sales increased 20.2% year on year to ¥12,538 million due to the effect of M&A, etc., in addition to the opening of new nursing care facilities and the greater occupancy achieved at our existing facilities. However, operating income decreased 15.2% year on year to ¥326 million. We entered into collaboration agreements with NJI Co., Ltd. and Tokyo Medical and Dental University (an incorporated national university) and began joint research on the development of standardization and guidelines for a total nursing care package that includes technologies for predicting end-of-life care and avoiding, mitigating, and responding to emergency events in nursing care. We will continue to strengthen our management base and expand our facilities by streamlining nursing care operations through the use of AI robots and other technologies to support nursing care, while striving to expand services under the unified "ALSOK's Care" Long-Term Care Services brand.

In other fields, we provide our existing inspection services for panels of solar power facilities. We continue to expand this business to include inspections and surveys of various facilities using drones.

The Group will continue to aptly meet the expanding safety and security needs of society by continuing to utilize new technologies and improve productivity, while fulfilling our responsibilities as a provider of services related to the safety and security of society.

## (2) Explanation of the Financial Position

With regards to the total assets as of the end of the consolidated accounting period of 1Q, there was a decrease of ¥1,652 million year on year, to a total of ¥514,995 million.

This is a result of the following factors: cash and deposits increased ¥12,006 million and other current assets such as prepaid expenses increased ¥7,309 million, while cash for Transportation Security (transportation of valuables) Services decreased ¥13,606 million and notes receivable, accounts receivable, and contract assets decreased ¥8,005 million.

Total liabilities decreased ¥3,138 million year on year to ¥169,615 million. This is a result of the following factors: "Other" current liabilities such as deposits received increased ¥9,583 million while notes and accounts payable decreased ¥8,660 million and income taxes payable decreased ¥3,610 million.

The status of cash flows is as follows.

(Cash flows from operating activities)

During the consolidated cumulative period of 1Q, net cash provided by operating activities amounted to ¥18,287 million, 164.4% more than the same quarter of the preceding fiscal year. This is a combined result of the following factors: an increase of ¥10,723 million due to an increase in assets and liabilities for Transportation Security (= transportation of valuables) Services, an increase of ¥9,167 million due to the quarterly income before income taxes, a decrease of ¥8,037 million due to decrease in notes and accounts receivable, and an increase of ¥4,492 million due to decrease in internal reserves due to depreciation and amortization, as well as a decrease of ¥9,187 million due to the decrease in notes and accounts payable and a decrease of ¥4,357 million due to corporate income and other related payments.

The increase in assets and liabilities for Transportation Security Services reflects changes in the amounts of funds procured for Transportation Security Services, which are part of "the cash and short-term loans payable for Transportation Security Services".

(Net cash provided by (and used in) investing activities)

During the consolidated cumulative period of 1Q, net cash provided by investment activities amounted to ¥1,839 million, 84.4% less than the same of the preceding fiscal year. This is a result of the decrease of ¥2,651 million due to acquisition of properties, plants and equipment.

(Net cash provided by (and used in) financing activities)

During the consolidated cumulative period of 1Q, net cash provided by financing activities amounted to ¥3,962 million, 31.0% less than the same of the preceding fiscal year. This is a combined result of the following factors: while an increase in short-

term loans payable resulted in an increase of ¥3,678 million, there was a decrease of ¥4,354 million due to payment of cash dividends, a decrease in cash dividends paid to non-controlling interests of ¥1,771 million, and a decrease of ¥1,363 million in repayment of lease obligations.

(3) Explanation of Future Forecasts such as Forecasted Consolidated Financial Results

With regards to the forecasted consolidated financial results of the fiscal year ending March 2024, there have not been any changes from the forecasts published on May 12, 2023.
